ZA Central Registry – Auction Policy

1. Introduction and Scope

- 1.1. The ZA Central Registry NPC (ZACR) will in the coming months be launching the dotAfrica TLD. As part of the launch process, the ZACR may run one or more “Sunrise Periods” and “Landrush Periods”.
- 1.2. It is most likely that more than one application will be made for particular domain names during these Limited Registration Periods. If such applications have equal priority and hence the applicants have an equal right to register the domain name in question, the Registry’s launch policies call for the parties to submit to an auction of the domain name to determine which application will be successful.
- 1.3. The purpose of this document is to establish the procedure and rules for the conduct of such auctions.

2. Definitions

- 2.1. **“Applicant”** means the applicant for registration of a domain name under a Launch Policy.
- 2.2. **“dotAfrica TLD”** is used for convenience to refer to the .africa TLD.
- 2.3. **“Launch Policy”** means a policy adopted by the Registry to regulate the launch of a Namespace, and which includes a Sunrise Period and/or a Landrush Period.
- 2.4. **“Landrush Application”** means an application for registration of a domain name made during a Landrush Period where the applicant has NOT been issued with an SMD for that domain name string.
- 2.5. **“Landrush Period”** refers to a period during the Launch Phase where applicants who have no prior right to a domain name can apply for its registration as described in this policy.
- 2.6. **“Launch Phase”** means a phase during the launch of the dotAfrica TLD consisting of the Sunrise Period and the Landrush Period.
- 2.7. **“Namespace”** means the .africa TLD.
- 2.8. **“Registry”** means ZA Central Registry NPC, appointed to administer the dotAfrica TLD.
- 2.9. **“Registry Website”** means Internet website at URL dotafrica.org (initially) and <http://registry.africa> (ultimately).
- 2.10. **“SMD”** means a Signed Mark Data file.
- 2.11. **“Sunrise Application”** means an application made during the Sunrise Period by an Applicant who has been issued with a SMD for that domain name string.
- 2.12. **“Sunrise Period”** refers to a period during the launch of a Namespace when holders of rights to names can register corresponding domain names, as required by ICANN.

- 2.13. “Sponsoring Registrar” means the Accredited Registrar for which a domain name is registered.
- 2.14. “TLD” or “Top-level Domain” means a top level domain of the domain name system.
- 2.15. “ZACR” means ZA Central Registry NPC, a non-profit company incorporated in the Republic of South Africa.

3. General

- 3.1. To preserve an orderly process in the potential rush for domain names, an auction process is adopted in order to allow competing qualified parties to bid for a domain name.
- 3.2. Applications will be referred to auction in the circumstances described in the relevant Launch Policy, and an Applicant may participate in an auction only if the relevant application has met the requirements for a Sunrise Application or a Landrush Application as the case may be as set out in the Launch Policy.
- 3.3. Notice of an auction will be sent to Applicants via email reasonably ahead of time for Applicants to prepare for the auction and for a “quiet period” to ensue prior to the auction being held. WHOIS information and information relating to the prior rights that give rise to an Applicant’s eligibility to that domain will be provided to all the eligible bidders for that domain for their reference. At the Registry’s discretion, particular information about an Applicant may be withheld.

4. Eligibility of Bidders

- 4.1. The Registry only measures an Applicant’s priority and eligibility to participate in an auction against the provisions of the relevant Launch Policy.
- 4.2. Any decision of an Applicant’s eligibility is not an indication of an Applicant’s legal entitlement to a naming right, or any other intellectual property right. So long as an Applicant is deemed eligible under the relevant Launch Policy, it has a *prima facie* right to take part in the auction for the domain name it applied for.
- 4.3. If an invited bidder disputes the entitlement of any competing bidder, it must notify the Registry and initiate a dispute prior to the commencement of the auction for that domain name. The Registry and the auctioning process is not a forum for a bidder to challenge the entitlement of other bidders. It will be the responsibility of any challenging bidder to establish its rights against other bidders as set out in the “Disputes” clause of the relevant Launch Policy. Notice of any such dispute must reach the Registry by no later than 7 (seven) days after the relevant Applicant has been informed of the auction.
- 4.4. In the event of any disputes or challenges amongst eligible bidders, the Registry will at its sole discretion, or at the direction of the competent tribunal, suspend the auction of a domain name until such disputes or challenges are resolved or otherwise mitigated based on the Registry’s knowledge or understanding.

5. General Form of Auction

- 5.1. Auctions will be held exclusively amongst eligible bidders. As such, this is described as a “closed auction”.

- 5.2. Before the auction commences, each bidder will be required to pay an auction deposit to confirm its participation in the auction process for all auctions that the bidder is eligible for. The auction deposit will be paid via credit card on the auction website. The auction deposit will be blocked against the bidder's credit card and unblocked at the end of the last auction.
- 5.3. A conventional "English-style" auction format will be used where eligible bidders will bid against one another, with each bid being higher than the previous bid. The Registry may determine an increment by which each bid must exceed the last, and provide information regarding the increment on the auction website.
- 5.4. Bidders may decide to opt-in for an SMS notification in the event that they are outbid during an auction. Such an opt-in will be available per auction.
- 5.5. Each Applicant (i.e. bidder) will be able to observe the price of each bid placed by itself or its competitors. That is, the current bid price and whether or not the Applicant is the leading bidder. Bids are accepted for the auction period (72 hours), and the winner is the party with the highest bid at the close of the auction period.
- 5.6. Bidders will be notified via email and SMS (if opted-in) if they have been outbid in an auction.
- 5.7. If any bid is made within 12 (twelve) hours of the end of the auction period, the auction period will be extended by a further period of 24 hours to allow further bids to be made. Such an extension will be made indefinitely until there are no more bids in the final 12 (twelve) hours of an auction.
- 5.8. At every extension to an auction as outlined in Clause 5.7. above, the Registry may elect to increase the minimum bid requirement for each bid. Bidders will have to bid at the very least the minimum bid requirement. As a default, increases in increments during extensions will be at 10% of the current bid.
- 5.9. A minimum or "reserve" bid may be imposed as set out in the relevant Launch Policy.
- 5.10. All bidders will have their auction deposit unblocked at the end of the last auction for which they are an eligible bidder. Unblocking will be processed automatically.
- 5.11. All bids are inclusive of Tax, if Tax is applicable.
- 5.12. The winning bidder of an auction will be notified via email. The email will include an invoice for their final bid as well as instruction on how to pay.
- 5.13. Winning bids that are higher than a specified threshold will have to be paid via Electronic Funds Transfer (EFT) instead of Credit Card. If a bid is past the threshold, the notification sent to the winning bidder will contain banking details and allotted time for payment. The threshold will be specified on the auction website.

6. Allocation of Domain Names

- 6.1. The domain name will be allocated to the winner of that particular auction.
- 6.2. An eligible bidder may withdraw from an auction, provided that it notifies the Registry in good time prior to the commencement of the auction it is due to take part in. After any such

withdrawal, if there is only one bidder remaining, the auction will be cancelled and the domain allocated to the remaining bidder.

- 6.3. If no bids were received during the time allotted for an auction, the eligible bidders for the domain name will be considered to have forfeited their interest for the domain name and will forfeit their entire auction deposits. The domain name may be re-auctioned at the Registry's discretion or released and become available for general registration.
- 6.4. In the event that a winning bidder is unable to make payment for the auction, the second-highest bidder will be the default winner. The second-highest bidder will be offered the auction at their final bid amount. In the event that the second-highest bidder declines the auction win, the default winner will be the third-highest bidder at their final bid amount, and so forth until there is no bidders willing to accept the auction win. In the event that no bidders have accepted the default auction win, the domain name may be re-auctioned at the Registry's discretion or released and become available for general registration.

7. Miscellaneous Provisions

7.1. Modifications, Guidelines and Enforceability

- 7.1.1. The Registry may issue interpretive guidelines on the Registry Website regarding the terms of this launch policy. The Registry may modify this policy from time to time, and modifications will take effect at the time they are announced on the Registry Website and without prior notice to Applicants, registrars or registrants.
- 7.1.2. If any part of this policy is declared invalid or unenforceable for any reason, the remainder of this policy will remain valid and enforceable as if the invalid or unenforceable part were not included herein.
- 7.1.3. There will be substituted for any invalid or unenforceable provision a suitable provision that, as far as is legally possible, comes nearest to the sense and purpose of this policy, taking into account all other applicable rules and policies.

7.2. Limitation of Liability and Decisions by Registry

- 7.2.1. To the extent allowed under mandatory law, the Registry will only be liable where the Registry's gross negligence or wilful misconduct is proven. In no event will the Registry be held liable for any indirect, consequential or incidental damages or loss of profits, whether contractual, based on delict (including negligence) or otherwise arising, resulting from or related to registration or use of a domain name or to the use of its software or website, even if it has been advised of the possibility of such loss or damages, including but not limited to decisions taken by the Registry to register or not to register a domain name on the basis of the findings of the Registry as well as the consequences of those decisions.
- 7.2.2. To the extent allowed under mandatory law, the Registry's liability for damages will in any case be limited to an amount equal to the application fee paid to the Registry (that is, the fees collected from the Sponsoring Registrar by the Registry for the submission of the corresponding application, not including any other fees paid by the registrant for the acquisition of the domain, such as fees paid to the Sponsoring Registrar or auction fees) in the context of submitting the application. The Applicant agrees and accepts that no greater or other damages may be claimed from the

Registry (such as, but not limited to, any fees payable or paid by the Applicant in the context of any proceedings initiated against a decision by the Registry to register or not to register a domain name). The Applicant further agrees to submit to the disputes procedure described in the relevant Launch Policy or such other appropriate dispute resolution mechanism provided by the Registry, or ICANN as the case may be, for disputes arising from the start-up process and related allocation of domain names.

- 7.2.3. The Applicant will hold the Registry harmless from claims filed or disputes initiated by third parties, and will indemnify and compensate the Registry for any costs or expenses incurred or damages for which it may be held liable as a result of third parties taking action against it on the grounds that the application for or the registration or use of the domain name by the Applicant infringes the rights of a third party.
- 7.2.4. For the purposes of this clause, the term “Registry” also refers to its members and subcontractors, and each of their respective directors, agents and employees.
